Professional Summary

Detail-oriented **Software Test Engineer (1+ year)** with expertise in **Automation Testing (Selenium, REST Assured, Cypress)** and **CI/CD (Jenkins, Docker)**. Strong in **API testing, framework design, regression testing, and defect reporting**. Adept at working in Agile environments and delivering **scalable, reusable test automation solutions** aligned with business and client requirements.

Core Skills

- **Automation Tools:** Selenium WebDriver (Java), Cypress (JS), REST Assured
 - **CI/CD & DevOps:** Jenkins, Docker, GitHub
 - **Testing Areas:** API Testing, UI Automation, Regression, Functional, Exploratory
 - **Frameworks:** TestNG, Maven, Allure Reporting
 - **Other:** Agile Methodologies, Bug Reporting, Manual QA
-

Professional Experience

Software Test Engineer | BPAAS | Oct 2024 – Present

- Designed and executed **UI and API test automation frameworks** (Selenium + REST Assured) improving coverage by **30%**.
 - Automated **end-to-end workflows** for multi-user committee module (Admin, Convener, HOD), validating quorum, scheduling, and approval flows.
 - Implemented **Jenkins CI pipelines** with GitHub integration for nightly regression.
 - Deployed Selenium Grid on **Docker** for parallel cross-browser execution.
 - Performed **defect triage, root-cause analysis**, and collaborated with dev teams to ensure timely bug fixes.
-

Key Projects

- **Vendor Onboarding Automation Suite** – Automated **multi-role workflows** (Initiator, HOD, Vendor, Tax Team) ensuring 360° functional coverage.
 - **Invoice Upload API Tests** – Designed **REST Assured framework** with schema validation, token handling, and reporting.
 - **Cypress UI Automation** – Built reusable test suites for modern web apps with **JavaScript & Mocha**.
-

Education

- **B.Sc.** – 2024
 - **SDET Training**, Masai School – 7 Months Intensive Program
-

Certifications

- Selenium WebDriver with Java – Test Automation University
- Agile Manual & Automation Testing – TechCanvass
